EDUCATION

Patkar Varde College   Goregaon West, Mumbai
Bachelor of Science in Information Technology   *Aug. 2022 – May 2025*
CGPA: 8.9

DP Public School   Prayagraj, Uttar Pradesh
HSC   *Aug. 2019 – May 2020*
Percentage: 82%

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS
Front-end: Nextjs, React, Zustand, Tailwind Css, Shadcn UI
Back-end: Node, Express, Prisma, REST API, MongoDB, Postgresql
Cloud/DevOps: Git, Docker, AWS

PROFILE SUMMARY

Full-stack developer and BSc IT graduate experienced in building scalable, user-centric web applications using React, Next.js, Node.js, and TypeScript. Skilled in designing modern UIs, integrating REST APIs, managing databases with Prisma, MongoDB, Postgresql, and deploying Dockerized apps. Continuously learning and exploring different techs and clean code practices to build production-grade web apps.

EXPERIENCE

Omnipresence Venture   Mumbai, Maharastra
Frontend Developer   *Oct 2025 - Present*
- Developed a mobile-responsive B2B e-commerce platform with a focus on performance and SEO.
- Built reusable frontend components and optimized rendering for better maintainability and speed.
- Designed a startup landing page end-to-end, handling layout, responsiveness, and performance optimization.
- Contributed to a SaaS-based application, working on features with a focus on scalability, code quality, and user experience.
- Tech Stack: Nextjs, React, node, express, tailwindcss, typescript, REST API

PROJECTS

ChatBot | *Nextjs, TypeScript, node, express, groqApi, Tavily*   Sep 2025
- Developed an intelligent chatbot capable of real-time conversational responses using API's of LLMS
- Integrated Tavily Web Search API to enable the chatbot to fetch live web results and provide up-to-date.
- Tech stack used to build is Nextjs, express, langchain
- Focused on modular design, performance optimization, and secure API key management for production-level scalability.

DevAI | *Nextjs, TypeScript, Prisma, PostgreSQL, Docker*   April 2025 - July 2025
- Full-stack web app built with Next.js, TypeScript, Rest Api, Prisma, and Clerk, leveraging Docker for spining up database and Tailwind CSS/React for a modern UI.
- AI-driven website generation from user prompts, streamlining rapid prototyping and project/code management.
- Includes E2B sandbox for secure, isolated code execution and experimentation within the platform.
- Supports subscription billing, robust authentication, Ensures scalability and stability with background/AI job handling, API rate limiting.

MERN Ecommerce | *JavaScript,React, Redux, Node, Express, MongoDB, Git*   May 2025 – July 2025
- An E-commerce platform using the MERN stack with Redux Toolkit for advanced state management.
- Developed RESTful APIs with Express and Node.js, integrated JWT for authentication.
- Implemented file uploads (Multer), cloud storage (Cloudinary), and PayPal SDK for payment processing. Designed responsive frontend with React, TailwindCSS, and Shadcn UI; used React Router for navigation and Axios for API calls.
- Robust admin panel for managing products, orders, statuses, and featured banners/images.
